

LUNG CANCER PROGRAM

Partners in Cancer Care

- A National Cancer Institute-designated Comprehensive Cancer Center
- Personalized treatment by a nationally renowned team of specialists
- Research interests in mesothelioma

Multidisciplinary Approach to Care

The Thoracic Oncology Team combines excellent patient care with research to fight the number one cause of cancer deaths for American men and women.

- A team of lung cancer experts from multiple specialties work together to provide patients with the best cancer care available.
- The team consists of medical oncologists, surgical oncologists, radiation oncologists, pulmonologists, pathologists, radiologists and supportive care experts.
- Patient care is discussed and coordinated at a twice-monthly lung cancer tumor board. All cases are welcome, including from community physicians.

Lung Medical Oncology

The Medical Oncology section of the Lung Cancer Program offers:

- Highly targeted drugs that act more selectively on cancer cells and have less toxic effect on normal cells
- Clinical trials that bring the most active new agents to our patients
- Laboratory research on the biology of lung cancer
- The exploration of new strategies to prevent, diagnose and cure lung cancer

Lung Surgical Oncology

The Surgical Oncology section of the Lung Cancer Program offers:

- Surgical approaches to lung cancer, mesothelioma and benign diseases of the pleura
- Minimally invasive thoracic surgery including video assisted thoracoscopic (VATS) lobectomies for lung cancer

Lung Radiation Oncology

The Radiation Oncology section of the Lung Cancer Program offers:

- State-of-the-art equipment including stereotactic body radiosurgery and TomoTherapy®

LUNG CANCER PROGRAM
